

Standardised or customised – state-of-the-art hydraulic solutions

Dipl. Ing. K. Dietzel GmbH with its headquarters in Beerwalde (Germany) develops and manufactures products at the highest technical level.

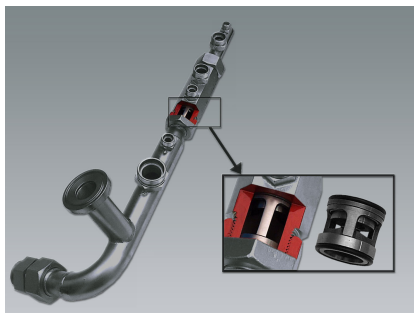

From standard and special hose fittings, assembled hose lines and pipelines up to complete line systems, all is deliverable in divers constructions and pressure ranges.

Advantages due to product innovations, optimisation of solutions

1. Situation customer

Highly qualified and experienced design engineers are continually developing new solutions to replace conventional and expensive products. Thereby mostly large screw connections are replaced by complete variants.

2. Solution Dietzel

The benefits of these optimised solutions are:

- Assembly times and -errors are reduced respectively avoided
- Leakages are minimised
- Weight and space savings, especially for small installation spaces
- Higher safety
- Improved stock keeping

As you can see, IPAR Industrial Partners b.v. is only working with the best manufacturers who always look for the most efficient solution for the customers.

You can rely on our quality.
